PROFESSIONAL SUMMARY

Senior Software Engineer with 15+ years of experience designing, developing, and delivering full-stack, data-driven, and cloud-native applications. Proven expertise in building scalable systems, ETL pipelines, and AI/ML-powered solutions. Skilled at leading cross-functional teams and driving enterprise-grade projects from conception through deployment. Strong background in data engineering, distributed systems, cloud architecture, and frontend/backend development. Adept at applying Agile methodologies to consistently deliver high-quality, performant software.

PROFESSIONAL EXPERIENCE

Sr. Software Engineer – T-mobile / IOPEX

Feb 2025 – Present | Remote

• Led development of the SLOSLI system enabling real-time KPI tracking across messaging infrastructure, reducing SLA breaches by 35%.
• Implemented high-throughput ETL pipelines processing terabytes of data daily from MySQL/PostgreSQL, improving data reliability by 40%.
• Engineered robust database connection recovery logic, ensuring 99.99% uptime under high-load conditions.
• Integrated React dashboards and Grafana visualizations for real-time KPI insights, adopted by 200+ internal users.
• Spearheaded backend foundation of the Messaging Heatmap project leveraging Kafka consumers with Kerberos-secured pipelines for streaming billions of messages daily.
• Designed staging architecture with advanced logging and observability, improving debugging efficiency by 50%.

Sr. Software Engineer – D&J IDIOMAS

Dec 2017 – Nov 2024

• Developed NLP pipelines in Apache Spark and Keras, automating 40% of translation workflows, reducing delivery times by 66%.
• Built production-grade Flask microservices on Azure & GCP, sustaining 100K+ daily API calls at 99.95% uptime.
• Implemented H2O.ai AutoML anomaly detection, boosting learner-performance forecasting accuracy by 18%.
• Integrated CI/CD pipelines with Docker & Git, reducing deployment errors by 45%.

• Applied model optimization techniques (quantization, pruning), lowering inference latency 28% on edge devices.
• Authored technical documentation and interactive tutorials, improving onboarding efficiency by 22%.
• Elevated model F1-score 12% via robust preprocessing and feature-selection pipelines.
• Championed data governance frameworks and security standards, enhancing compliance and reducing risk exposure.

Sr. Full Stack Developer – Design Concepts Inc

Sep 2009 – Mar 2017

• Designed and developed enterprise-grade web applications using React, Angular, and Node.js, serving 50K+ users.
• Migrated legacy systems to cloud-native architectures on AWS, reducing hosting costs by 30%.
• Built CI/CD pipelines with Jenkins, Git, and Docker, cutting deployment times by 70%.
• Led integration of MySQL/Postgres with NoSQL databases (MongoDB), boosting query performance 25%.
• Developed microservices with REST APIs and event-driven architectures, enabling scalable solutions.
• Trained and mentored 8 junior developers, improving team productivity and code quality.
• Conducted performance profiling and optimization, reducing page load times by 40%.

EDUCATION

Bachelor's Degree in Computer Science – Armstrong Atlantic State University, 2010

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, TypeScript, Node.js, React, Angular, C#, .NET, Django, Flask
Data & Cloud: Kafka, MySQL, PostgreSQL, MongoDB, Redis, Airflow, Spark, Hadoop, AWS, GCP, Azure
AI/ML: TensorFlow, Keras, scikit-learn, AutoML, NLP, Recommendation Systems, Anomaly Detection
Tools: Docker, Kubernetes, Jenkins, Git, Terraform, Grafana, Prometheus, Datadog
Other: ETL Pipelines, Microservices, CI/CD, Agile/Scrum, Data Governance, Performance Optimization
